- I. “Additional Evidence of the Affinities of the Extinct Marsupial Quadruped, *Thylacoleo carnifex*, Ow.” By SIR RICHARD OWEN, K.C.B., F.R.S. Received October 5, 1886.

(Abstract.)

The subject of this paper is an entire lower jaw of the large extinct marsupial which the author from previous fragmentary fossils concluded to be part of a carnivorous beast of the size of a lion, the probable prey of which had been the larger herbivorous marsupials, also now extinct. Every additional character in the subject of the present paper confirms the fitness of the genus named *Thylacoleo*.
